ABOUT ME

Full-stack developer with 2+ years of experience delivering production ready web and mobile applications across SaaS, CRM, AI, web3 and e-commerce. I have foundational AWS knowledge and hands-on experience with RAG workflows, third-party integrations and automation tools like n8n and Zapier. I utilize AI tools, claude, codex etc with reusable skills, plugins, memory and multi-agent workflows to increase productivity and deliver better results. My transition from accounting to software development has given me a detail-oriented and analytical approach to engineering work. I'm passionate about learning new tools and technologies and i adapt comfortably to different projects and environments.

WORK EXPERIENCE

01/12/2024 - CURRENT - ISLAMABAD, PAKISTAN

MERN STACK DEVELOPERFEXEN SMART SOLUTIONS

- Delivered 10+ production ready SaaS, CRM, AI, blockchain and e-commerce products, turning business requirements into reliable and scalable features.
- Built and maintained complete product workflows across frontend including onboarding, authentication, payments, AI features, Rest api's and third-party integrations.
- Solved performance and scalability issues by improving data loading, filtering, pagination, database queries, and frontend state handling.
- Created real-time integrations, scheduled jobs and monitoring workflows to keep systems synchronized, reduce manual work and fix operational issues quickly.
- Automated marketing, sales and support processes across connected platforms, improving data flow and reducing repetitive team tasks.
- Built AI-assisted automation workflows that connected business tools, processed campaign data, and supported chatbot and product workflows.

Projects

TripPak | AI-Powered OTC Health Assistant

Trippak is a mobile App that helps OTC health-kit users search products across 148 symptom categories, view drug facts and usage guidance. Cleaned and structured product and symptom data for vector-store retrieval then developed a RAG assistant using OpenAI vector search with a local BM25 fallback. Added safety triage, verified product-card responses and virtual-care escalation for cases needing further support.

Tech stack: Expo, React Native, TypeScript, Firebase Realtime Database, Cloudinary, OpenAI Vector Stores

Inglés Ahorita | AI-Powered CRM & Academic Platform: www.inglesahorita.com | crm.inglesahorita.com | academic.inglesahorita.com

Built a full-stack education platform with CRM, student and teacher portals, plus a Kajabi landing page for call bookings. Integrated Kajabi, ManyChat, Deepgram, Google Analytics, Zoom, Calendly, n8n, and external APIs to support real-time data flows, scheduling, call transcription, and AI chatbot interactions. Created n8n agentic automation workflows to process campaign data and sync events with Meta for improved ad tracking and optimization.

Tech stack: React 19, TypeScript, Node.js, Supabase (PostgreSQL), OpenAI, Deepgram, n8n, ManyChat, Kajabi, WebSockets, Webhooks

Singularity | Decentralized Yield Portal: singularity-web-app-lime.vercel.app

Built a DeFi yield-farming platform for wallet-based investments, ROI tracking and secure deposit and withdrawal flows. Integrated Solidity smart contracts and Ethereum wallets with automatic chain switching and real-time on-chain data synchronization through wagmi, viem and React Query.

Tech stack: Next.js, TypeScript, wagmi, viem, React Query, JWT, Tailwind CSS, Radix UI, Ethereum

JitSuites | AI Marketing SaaS Platform : app.jitsuites.com | jitsuites.com

Built a marketing SaaS platform for creators and businesses, supporting email, SMS, social-media publishing, AI video and funnel automation. Developed the complete frontend and a drag-and-drop funnel builder with dnd-kit for creating landing pages and campaigns. Implemented JWT authentication, OAuth, polling and integrations including Brevo and Stripe.

Tech stack: React 19, TypeScript, NestJs, TanStack Router, TanStack Query, Zustand, Tailwind CSS, shadcn/ui, dnd-kit, JWT, Stripe, OAuth, Brevo

Other Frontend Projects:

- **Blockyfy:** Built a service-company website. blockyfy.com
- **NextSense Solutions:** Website for service based company. nextsensesolution.com

- **Travaleo:** Developed the frontend for a tokenized luxury real-estate investment platform. travaleo.com
- **Ethoro:** Built the frontend and smart-contract integrations for crypto staking and yield tracking. ethoro.io
- **ZawayaDAO:** Developed the complete UI and API integrations for real-estate tokenization workflows. zawayadao.com
- **Extsy:** Delivered frontend features and UI/UX improvements for a large crypto exchange platform. linktr.ee/ExtsyPlatform

01/05/2024 - 30/11/2024 - ISLAMABAD, PAKISTAN

FRONTEND DEVELOPER INTERNSTACK ONE TECHNOLOGIES

- Creating responsive websites with HTML, CSS and JavaScript.
- Worked with front-end libraries and frameworks like ReactJs, NextJs, Bootstrap and Tailwind CSS.
- Optimized front-end performance, reducing number of DOM manipulations and lazy loading of components.
- Enhanced user experience by adding form validation, dynamic and conditional rendering.
- Worked as a team in a git/GitHub environment, applied version control and feature branches.
- Used Tailwind CSS and Bootstrap to design the websites.

Projects:

Katana Healthcare: www.katana-healthcare.com

Created a modern, cross-device compatible and mobile responsive healthcare website with Next.js, implemented reusable components and optimized performance and initial load times with component code-splitting, lazy loading and smooth transition effects. Also integrated Google Analytics and Microsoft Clarity to monitor user engagement, capture user sessions and analyze conversions.

The Flame: https://the-flame-4002c.web.app

Developed a modern Restaurant Website with ReactJs having interactive UI to display menu, gallery, contact section. Created reusable components of the app such as Navbar, menu items, testimonials and contact form. Adjust smooth transition, styling the UI with CSS modules and Bootstrap CSS. Use of integrated smooth navigation using React Router for multi-page SPA experience.

EDUCATION & TRAINING

30/09/2024 - ISLAMABAD, PAKISTAN

BSC (HONS) INFORMATION TECHNOLOGY- ROOTS IVY INTERNATIONAL UNIVERSITY

Level in EQF: 6

01/06/2020 - ISLAMABAD, PAKISTAN

ACCA (FUNDAMENTALS)- SKANS SCHOOL OF ACCOUNTANCY

Level in EQF: 6

SKILLS

TypeScript | JavaScript | React, React Native, React Hooks, React Router | ReactJS, NextJS, Redux, Typescript | OOP & DSA | Version Control (Git) | Synchronous and asynchronous programming | Zustand | Redux/Redux-Toolkit | TanStack Query | React Query | REST Api's | Web-sockets | Firebase: Firestore, FirebaseAuth, Firestorage, RealTime database | Stripe Payments | Web3 integration | Crypto Wallets | threejs | Framer Motion | Ethereum Network | Webhooks | Back-end development: Node.js, Nest.js and Express.js frameworks | Automation Script Software (Zapier etc) | n8n | manychat | Supabase
